Quality and Environment Policy

Quality, security and environmental protection are considered for **Shingels** as a priority as well as a strategic need. In a competitive market as the current it is of vital importance to guarantee the survival and possibilities of growth of the company to provide a quality and environmentally friendly service.

Shingels has taken in this quality and environmental policy the following commitments:

1. To provide your customers with products and services that accomplish their necessities and expectations (implicit and explicit).
2. Continuously improve our system effectiveness and update this policy.
3. Communicate and apply this policy to all the interested parties to ensure the participation in the achievement of our objectives.
4. Establish objectives to improve our system performance in integrated management in quality and environment.
5. Accomplish our legal requirements applicable and others subscribed requirements in quality, environment and industrial security.
6. Protect the environment and reduce the environmental impact of the activities that the company develops through:
 - a) The reduction of the use of harmful substances, dangerous and not respectful with the environment in the composition of our products, trying to select the most ecological raw materials and with less impact to the environment.
 - b) The optimization of the consumption of natural resources (water, energy, etc.)
 - c) The reduction of the amount of waste generated and the emissions to the atmosphere.
 - d) The optimization of our logistic operations in order to contribute to the management of transport usage and thus minimize the contamination of our operations.
 - e) The prioritization of recycling as a destination for waste generated in the company.
